

Barco Metal Stamping Company, Inc. Commitment to Quality

Barco takes pride in providing its customers with honest product and service. We work to maintain flexibility and rapid response, believing that close communication between customers and staff enables us to provide quality service and satisfaction.

Orders are accurately processed, completed and delivered in a timely manner. Process controls are used throughout all operations to monitor product quality. Barco employees are motivated individuals who have the authority to stop processes to control and prevent nonconforming product. They all have the authority to initiate corrective and preventative actions and improvements related to the product and the processes.

Our employees are aware that quality control is everyone's responsibility. It is their job to see that a quality program is followed from the time the customer's order is received through to the delivery of the product to the customer.

Quality Policy Statement

“BARCO METAL STAMPING will strive to meet the customer requirements and expectations by providing a quality product, on time. We will analyze our processes and data to continually improve our product and our Business Management System.”
